### 性能特点

MAIN FEATURES

长纤维牛皮纸材质，韧性好，不易破，100%可回收、可生物降解。经过压泡机的特殊处理后，在纸张表面形成3D且富有弹性凸起结构的环保缓冲材料，在物流运输中起到有效缓冲、避免包裹互相碰撞的作用。经过纸垫机挤压，形成3D立体纸垫，卷曲成盘状时，其抗压强度和弹性足以承受60kg以内的重型物品的重量，灵活多变的包装方法。

Kraft paper rolls good toughness, not easy to break, 100% recyclable, biodegradable. After the special treatment of the pressure bubble machine, the surface of the paper to form a 3D and elastic raised structure of environmental protection cushioning material, in the logistics and transport to play an effective buffer, to avoid packages colliding with each other. After the paper cushion machine extrusion, the formation of 3D three-dimensional paper cushion, curled into a disc shape, its compressive strength and elasticity is enough to withstand the weight of heavy items within 60kg, versatile packaging methods.

### 适用范围

APPLICATION

广泛于包装行业、物流行业、零配件加工行业，如化妆品、精密仪器、仪表、金属零配件等；多变的包装方法，可以作为填充料、固定物品减少晃动；包裹产品，避免包裹互相碰撞等。

Widely used in packaging industry, logistics industry, spare parts processing industry, such as cosmetics, precision instruments, meters, metal spare parts, etc.; versatile packaging methods, can be used as filler, fixed items to reduce shaking; parcel products, to avoid packages colliding with each other.

# Bubble Paper Wrap

## 压泡纸

### 性能特点

MAIN FEATURES

缓冲压泡纸是一种用于缓冲包装的新型材料，它由牛皮纸通过机器压制而成。压泡纸双面凸起的压泡结构富有弹性，形成优异的缓冲减震性能。是传统气泡膜的优选替代品。通过增加易撕刀工艺，使压泡纸在使用时更方便、更快捷。采用风琴堆叠的方式体积小，运输成本低，能大大减少储存空间。压泡纸全部由纸制作而成，对环境无污染，更加环保。适用于各种不同类型的物品，包括奇形怪状的物品，如电子产品、玻璃制品等。

Bubble paper wrap is a new type of material used for cushioning packaging, which is made of kraft paper pressed by machine. The double-sided raised pressure bubble structure of the bubble paper wrap is elastic, forming an excellent cushioning and shock absorption performance. It is a preferred substitute for traditional bubble film. By adding the easy-tear knife process, the bubble paper wrap is more convenient and quicker in use. Adopting organ stacking is small in size and low in transport cost, which can greatly reduce the storage space. Bubble paper wrap is made entirely of paper, no pollution to the environment, more environmentally friendly. Suitable for all different types of items, including odd-shaped items, such as electronic products, glass products, and so on.

### 适用范围

APPLICATION

广泛应用于包装行业、物流行业，电商行业等，如酒类、化妆品、精密仪器、陶瓷玻璃、工艺品等易碎品环保缓冲保护。

Widely used in packaging industry, logistics industry, e-commerce industry, etc., such as wine, cosmetics, precision instruments, ceramic glass, handicrafts and other fragile products environmental protection buffer protection.

## 蜂窝纸信封袋

### 性能特点 MAIN FEATURES

新型环保蜂巢纸信封邮寄袋，内衬采用3D蜂窝结构牛皮纸填充制成，可有效的保护物品，降低因运输引起的震动与跌落伤害。采用全纸张结构制造，不使用气泡膜，回收更容易，环保无负担，100%可回收并且可生物降解。自粘封口，即撕即用，方便快捷，节省大量包装时间和人工成本。多种尺寸可供选择，以满足各种运输需求，可定制规格尺寸、印刷图案、logo等。

The newly developed honeycomb paper mailer a eco-friendly cushioning bags, made of all paper materials and 100% recyclable. They are alternative of plastic cushioning bags which can reduce pollution to the environment, also will become an important participant in the world's environmental protection.

- Made from recycled paper, this paper padded envelope is fully recyclable & naturally biodegradable.
- Kraft exterior presents a quality image and makes an excellent surface for custom printing and writing.
- The self-sealing closure is tamper-evident and easy-to-use, it is very suitable for fulfillment operations.
- Compared with the bubble mailers, the honeycomb paper does not dust, it is therefore ideal for allergy sufferers.

### 适用范围 APPLICATION

广泛于包装行业、物流行业、如化妆品等贵重物品，书籍杂志、数码产品、衣服饰品等缓冲保护。

Widely used in packaging industry, logistics industry, such as cosmetics and other valuables, magazines, with digital products, clothing and jewellery buffer protection.

## 纸垫机系列

## 性能特点

MAIN FEATURES

- 出纸速度快, 大幅提高生产率, 海量订单从容打包。
- 多种操作方式, 操作简单, 适用于各种包装场合。
- 缓冲纸包装具有很高的抗压和缓冲能力, 有效保护物品。
- 纸包装可节省运输和储存空间, 降低成本。
- 应用范围广泛。

- The paper dispenser machine has a fast paper output speed, which improves productivity and increases shipment volume.
- A variety of operation modes, simple operation, suitable for various packaging occasions.
- The cushioning kraft paper has a high compressive and cushioning capacity, which effectively protects items.
- Paper packaging cushion can save space in transportation and storage, reduce costs.
- Wide range of applications.

PRODUCT INFORMATION

产品名称(Product name)	纸包装机(Paper cushion machine)
产品耗材(Product disposables)	100%可生物降解牛皮纸 (100% biodegradable kraft paper)
产品类型(Product type)	蜂窝走纸机/压泡机等(Honeycomb paper dispenser/Paper bubble machine)
关于定制(About customization)	可定制各种尺寸和logo。(Customize acceptable, LOGO printing acceptable.)
产品特征(Product features)	缓冲纸垫机将牛皮纸、蜂窝纸利用率达到最大化的自动化机器, 可以帮助纸类耗材快速成型, 实现更好的缓冲包装效果。 (The cushioning paper pad machine maximises the utilisation of kraft paper and honeycomb paper in an automated machine that helps paper consumables to be shaped quickly for better cushioning packaging.)

## 适用范围

APPLICATION

纸机器可以帮助纸类耗材快速成型, 实现更好的缓冲包装效果。机器通过将牛皮纸压制形成具有轻便、柔软、弹性好等新型缓冲包装。如压泡机可以将纸经过特殊处理后, 在纸张表面形成3D且富有弹性凸起结构的环保缓冲材料, 起到有效缓冲、避免包裹互相碰撞的作用。纸垫机将纸挤压, 形成3D立体纸垫, 可以折叠、卷曲、揉捏、创造一个灵活多样的包装方法。拉纸机可以将蜂窝纸快速、均匀拉伸, 不仅节省了仓储空间, 同时减少人工成本。专业的设备可以带来效率上大幅提升。

Paper machines can significantly speed up the molding process for paper materials, achieving superior cushioning effects for packaging. By compressing kraft paper, these machines create a new type of cushioning that is lightweight, soft, and highly elastic. For instance, paper bubble machine can process paper to create a 3D, elastic, bumped structure on the surface, providing effective cushioning and preventing packages from colliding with each other. Pad machines compress paper into 3D structured pads that can be folded, rolled, and kneaded, offering flexible and diverse packaging solutions. Electric honeycomb paper dispenser can quickly and evenly stretch honeycomb paper, not only saving storage space but also reducing labor costs. Professional equipment significantly enhances efficiency.

## 蜂窝拉伸纸盒

### 性能特点

MAIN FEATURES

这是一款简易版手动蜂巢纸拉伸机，它实现了机器和耗材的二合一，无需再借助外置机器就能拉伸蜂窝纸。体型小巧易于收纳。价格低廉、节省人工；操作简单、随时拿取随时使用。非常适合办公室、个人家庭和商品店使用。

This is a simple version of manual honeycomb paper stretching machine, which realizes the two-in-one machine and consumables to stretch honeycomb paper without the need of an external machine. Compact size is easy to store. Inexpensive and labor-saving; easy to operate, ready to pick up and use at any time. Perfect for offices, individual homes and merchandise stores.

### 性能特点

MAIN FEATURES

轻型纸垫机是一款全自动轻量型纸垫机，专门为快递物流、生产流水线、电商办公室、实体门店等对产品有保护与填充包装需求的客户所设计。该款产品有三种操作模式，能适用三种耗材。

1. 机头可直接放置桌面上使用；
2. 自动出纸与切纸，操作更省时省力；
3. 可以使用三种耗材，折叠纸/卷筒纸/蜂巢纸；
4. 机头角度可调节，满足多种角度需求；
5. 支架高度可自由调节，适用不同高度的操作台。

Automatic Lightweight Paper Pad Machine is designed for logistics, assembly line, e-Commerce, office, express delivery, entity stores etc. which have the needs for packaging protection & space filling, it is more convenient and efficient to use.

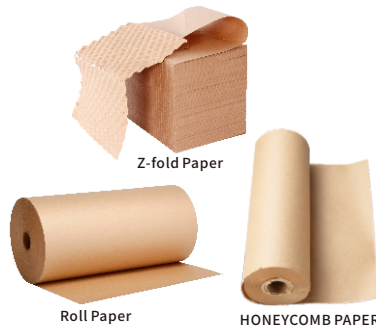

1. The machine head can be placed directly on the desktop to use.
2. Automatic paper dispensing and cutting, operation is more time-saving and labour-saving.
3. Adjustable Head Angle: Meet the needs of various angles.
4. The Frame Height Can Be Adjusted Freely: Suitable for different height of the console.
5. Three consumables to choose from, folded paper/roll paper/beehive paper.

### 性能特点 MAIN FEATURES

牛皮纸经机器折叠、中间滚压、两边挤皱后，形成有很多小空间的3D立体纸垫，具有很好的支撑缓冲效果。纸垫长度可任意选择，卷曲成盘状时，其抗压强度和弹性，足以承受60kg以内的重型物品的重量。多变的包装方法，除了有填充、缓冲、包裹的作用，还能固定物品减少晃动，避免因产品损毁而增加成本。

1. 可设定不同长度、需求数量；
2. 三种出纸模式选择：(a)自动连续出纸，(b)取补模式，(c)脚踏模式；
3. 全触摸屏操作面板，易理解、易操作；
4. 多角度出纸，操作便捷。

Kraft paper folded by machine, rolling in the middle and squeezing wrinkles on both sides, forming a 3D three-dimensional paper pad with a lot of small space, which has a very good supportive cushioning effect. The length of the paper pad can be chosen arbitrarily, and when it is rolled into a disc shape, its compressive strength and elasticity are sufficient to withstand the weight of heavy items up to 60kg. Versatile packaging methods, in addition to the filling, cushioning, wrapping, but also fixed items to reduce the shaking to avoid the cost due to Product damage and increase costs.

1. Different lengths and required quantities can be set.
2. Three paper dispensing modes to choose from: (a) automatic continuous paper dispensing, (b) pick and fill mode, (c) foot pedal mode.
3. Full touch screen operation panel, easy to understand and operate.

## 气垫机系列

## 性能特点

MAIN FEATURES

气垫机是专门为填充袋、葫芦膜等缓冲膜充气的专业型机器。机器小巧，操作便捷，可随意更换包装作业场地，适用于各种包装作业流水线。全自动侦测膜以调整风量、温度，不需人工操作。触控式面板，LED显示；塑钢外壳，操作维护非常简单。适配性广泛、运行速度快、充气更饱满、封边整齐稳固等。根据现场需求即时将卷材制造成缓冲气垫，即需即取，消除了传统材料的运输和仓储问题。是大中小型工厂、仓储及包装流水线的必备之选。

The air cushion machine is specialised in filling bags and gourd film with air. The machine is compact, easy to operate, and can be changed at will for packaging operation sites, and is suitable for all kinds of packaging operation assembly lines. Fully automatic film detection to adjust the air volume and heating temperature, without manual operation. Touch panel, LED display, plastic casing, very simple operation and maintenance. Wide range of adaptability, fast running speed, fuller inflation, neat and stable sealing edges, and so on. According to the site requirements instantly coil material manufacturing into a cushion of air cushion, ready to take, eliminating the traditional material transport and storage problems. It is a necessary choice for large and small factories, storage and packaging lines.

可吹膜卷类型(Blown film roll type)	葫芦膜、葫芦袋、气泡枕、四联排等 Compatible with air bubble film, air pillow bag, four rows pillow.

# Shoe Support Air Cushion Machine

## 鞋撑充气机

### 性能特点

MAIN FEATURES

机器可以很好兼容鞋撑、葫芦膜、气泡枕等。采用全新滚轮加热结构、水油分离, 损耗低, 使用寿命更长久。机身轻便小巧, 可随意更换包装作业场地。充气快速简便, 大大提高了包装效率。

The machine is well compatible with shoe struts, air bubble film, air pillows, and so on. Adopting new roller heating structure, water and oil separation, low loss and longer service life. The machine body is lightweight and compact, and can be changed at will for the packing operation site. Quick and easy to inflate, greatly improve the packing efficiency.

输入电压(Input voltage)	AC110-220V
额定功率(Rate power)	192W
额定频率(Rate frequency)	50HZ/60HZ
气量(Air flow speed)	0.4MPA/分钟(0.4MPA/min MAX)
充气机包装尺寸(Package Dimension)	375*365*360mm(L*W*H)
可吹膜卷类型(Blown film roll type)	鞋撑、葫芦膜、气泡枕、尼龙袋等 Compatible with shoe support, air bubble film, air pillow bag, nylon bag, etc.

### 适用范围

APPLICATION

搭配鞋撑充气机随用随充, 节省仓储空间。新型环保充气鞋撑能够防止鞋子产生褶皱, 防尘防潮, 延长鞋子寿命便于长期收藏护理等。绿色环保材料、高透明无毒无味无害, 可回收利用。

Match with the shoe support inflatable machine as you use it, save storage space. New environmentally friendly inflatable shoe support can prevent shoes from wrinkles, dust and moisture, extend the life of shoes for long-term collection and care. Green material, high transparency, non-toxic and odorless, recyclable.

# Winder-system

## 收卷架

### 性能特点

MAIN FEATURES

大功率电机极速收卷, 拒绝杂乱, 采用光电感应头可自动侦测收卷体积并智能自动停止收卷。自带脚轮可以自由推拉, 灵活部署, 方便又实用; 布局精美, 占用空间小。搭配充气机使用, 全自动收卷, 节省人工成本, 高效打包。

High-power motor for high-speed rewinding, refusing to be messy, using photoelectric sensor head can automatically detect the volume of rewinding and intelligent auto-stop rewinding. Used with air cushion machine, fully automatic rewinding saves labor cost and efficient packing efficiency. The winder-system with casters can be freely pushed and pulled, flexible deployment, convenient and practical; the layout is exquisite and occupies little space.

# Delivery System

## 风道传输系统

### 性能特点

#### MAIN FEATURES

输送系统采用空气驱动补给技术，通过向悬挂于安装站点上方的料仓输送并存储包装材料，极大程度地节约了地面空间消除场地混乱状况。一套系统可满足多个独立包装作业站点的需求，随时随地提供所需的包装材料。降低整体设备投资成本，带给您更多的间接收益。可以兼容多种机型，是高效、即时、按需生产轻量化包装的首选方案。

The conveyor system utilizes air-driven replenishment technology to save floor space and eliminate clutter by feeding and storing packaging materials in silos suspended above the installation site. A single system can fulfill the needs of multiple independent packaging sites, providing packaging materials wherever and whenever they are needed. Reduces overall equipment investment costs and brings you more indirect benefits. Compatible with a wide range of models, it is the preferred solution for efficient, just-in-time, on-demand production of lightweight packaging.

### 适用范围

#### APPLICATION

适用于大型电商、物流和生产流水线，一套系统可支持多个包装站点，有效实现标准化的包装操作，持续工作，告别停线的现象。

Suitable for large-scale e-commerce, logistics and production lines, a set of systems can support multiple packaging sites, effectively realizing standardized packaging operations, continuous work, say goodbye to the phenomenon of stopping the line.

# Automatic Collection of Overhead Unit

## 自动收集高架装置

### 性能特点

MAIN FEATURES

使用我们的新型高架装置，您可以高效、即时、按需生产。海量订单从容打包，提高效率，降低人工成本。

- ▶ 节省地面空间的架空安装设计，消除场地混乱状况
- ▶ 铝合金部件，经久耐用
- ▶ 自动化生产的传感器控制
- ▶ 气垫机的升降功能设计
- ▶ 输送并存储，随时随地提供所需的包装材料
- ▶ 操作简单，按需取补
- ▶ 支持定制个性化

With our new lightweight overhead unit, you flexibly adapt to new requirements in your logistics facility.

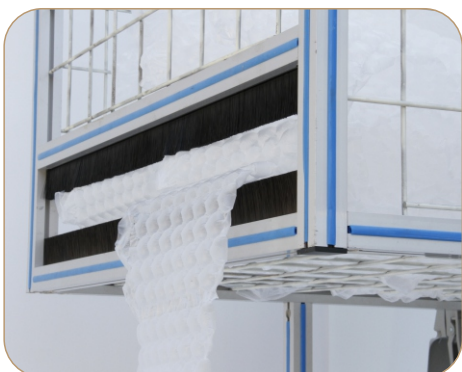

- ▶ Space-saving overhead installation
- ▶ Light version with aluminum components
- ▶ Sensor control for automatic production
- ▶ Lift function for the air cushion machine
- ▶ Air cushion production on stock
- ▶ Simple on-demand withdrawal
- ▶ Custom-made, individual configuration

# Air Cushion/ Column Film Tearing Machine

## 葫芦膜气柱袋撕袋机

### 性能特点 MAIN FEATURES

撕袋机适用于葫芦膜,有阀气柱袋等。将充好气的连卷葫芦膜,气柱缓冲袋按照预先设定的片数将易撕线撕开,从而进行存储或使用。有效的提升包装产品的速度和减少操作人员的劳动强度。设备内置大功率无刷电机,使用全齿轮传动系统,撕袋快速稳定;操作模式多样,可结合实际使用场景进行选择切换。

The bag tearing machine is suitable for air cushion film, air column film, and similar materials. It tears open the pre-set number of tear lines on the filled and rolled bubble wrap, along with cushioning air column bags, enabling storage or use. This effectively enhances the speed of packaging products and reduces the labor intensity of operators. The equipment features a high-power brushless motor and utilizes a full-gear transmission system, ensuring rapid and stable bag tearing. It offers various operating modes that can be selected and switched according to actual usage scenarios.

### 产品信息 PRODUCT INFORMATION

产品型号(Product model)	气柱袋撕袋机(Air column film tearing machine)
运行速度(Speed)	28米/分钟(max 28m/min)
充气机尺寸(Dimension)	580*305*280mm(L*W*H)
重量(weight)	36.5kg
输入电压(Input voltage)	110~220V/50~60HZ
额定功率(Rate power)	420W
最大充好气葫芦膜宽度(Maximum inflated bubble film width)	620MM
单片最大充好气葫芦膜长度(Maximum length of a single piece)	1000MM
环境条件(Environmental conditions)	Temperature 5~40°C; Humidity<85%RH

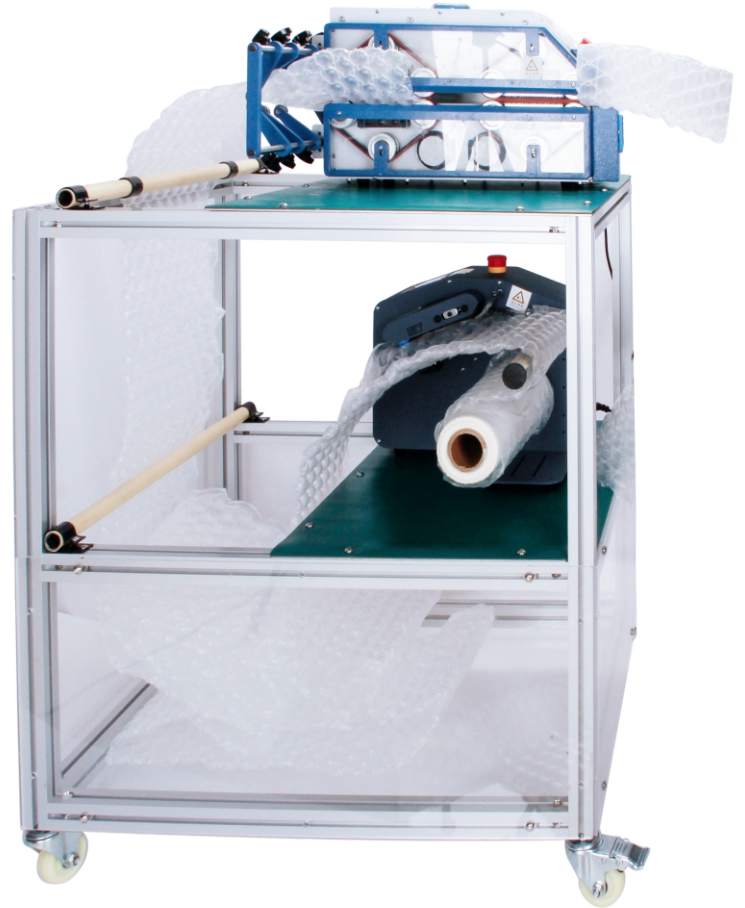

# Collection Tear Bag Cart A

## 收集自动撕袋推车A

### 性能特点 MAIN FEATURES

实现边充气边撕袋，充气撕袋收集一体，极大地节约了地面空间消除场地混乱状况。一套系统可满足多个独立包装作业站点的需求，随时随地提供所需的包装材料。自带脚轮可以自由推拉，灵活部署；布局精美，占用空间小。大幅降低人工成本，海量订单从容打包。可以兼容多种机型，是高效、即时、按需生产缓冲包装的首选方案。

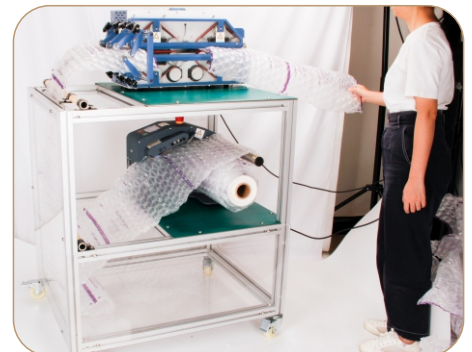

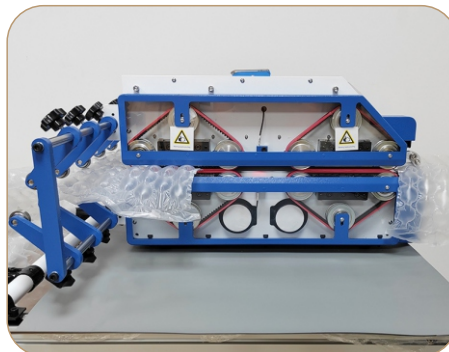

The implementation of inflating and tearing the bag simultaneously greatly conserves ground space and eliminates messy conditions on-site. A single system can meet the needs of multiple independent packaging stations, providing the required packaging materials anytime and anywhere. Equipped with caster wheels, it can be freely moved and flexibly deployed; its elegant layout occupies minimal space. This significantly reduces labor costs, making it easy to handle a large volume of orders. Compatible with various models, it is the preferred solution for efficient, instant, and on-demand production of buffer packaging.

### 适用范围 APPLICATION

适用于大型电商、物流和生产流水线，一套系统可支持多个包装站点，有效实现标准化的包装操作，持续工作，告别停线的现象。

Suitable for large-scale e-commerce, logistics and production lines, a set of systems can support multiple packaging sites, effectively realizing standardized packaging operations, continuous work, say goodbye to the phenomenon of stopping the line.

## 气柱充气机

## 性能特点 MAIN FEATURES

气柱充气机设备是给定制好的卷膜充气。全自动充气,可有效节省人工成本,避免传统人工充气因充气不稳定、气量过大而造成的破袋,有效降低产品破损率,提升工作效率。机器小巧,操作便捷,可随意更换包装作业场地,适用于各种包装作业流水线。智能化操作界面,LED屏显,钣金外壳,操作维护简单。可以很好兼容气柱卷、气柱袋等,不管是L袋、Q袋、U袋都能充的很饱满。

The air column machine equipment is to inflate the customised roll film. Fully automatic inflation, can effectively save labour costs, to avoid the traditional manual inflation due to unstable inflation, air volume is too large and caused by the broken bag, effectively reduce the rate of product breakage, improve work efficiency. Compact machine, easy to operate, can change the packaging site at will, suitable for a variety of packaging operations in the pipeline. Intelligent operation interface, LED screen display, sheet metal shell, simple operation and maintenance. It can be well compatible with air column rolls, air column bags, etc., no matter it is L bag, Q bag, U bag can be filled very full.

## 适用范围 APPLICATION

气柱充气机广泛应用于大中小型工厂、仓储及包装流水线、办公室、连锁店、快递公司网点打包等场所。即做即用,体积小,移动性佳,不占空间。用于易碎品、日用品、厨房用品、生鲜水果、精密仪器仪表、箱包填充、瓷器、医药用品、化妆品等保护物品在运输过程中不受损坏。

Air cushion machine is widely used in large and small factories, warehousing and packaging assembly line, office, chain shops, courier company outlets packing and other places. It is ready to use, small size, good mobility, and does not take up space. Used for fragile goods, daily necessities, kitchen supplies, fresh fruits, precision instruments and meters, bag filling, porcelain, medical supplies, cosmetics, etc. to protect items from damage during transport.
